

## **TRANSPORT INDUSTRY DELIVERS EAST MIDLANDS A NEW YEAR JOBS BOOST**

### **MANPOWERGROUP EMPLOYMENT OUTLOOK SURVEY REVEALS THE REGION IS THE SECOND MOST CONFIDENT IN THE COUNTRY**

- **Outlook of +11% for the region**
- **Transport sector fuelling growth in the East Midlands**
- **Fewer candidates actively seeking work forces companies to work harder to attract talent**

**12 DECEMBER 2017:** As the national Outlook hits a five-year low of +4%, employers in the East Midlands are defying the gloom and significantly outpacing the national average with a regional Outlook of +11%, according to ManpowerGroup, the world's workforce experts.

The Manpower Employment Outlook Survey is based on responses from 2,102 UK employers. It asks whether employers intend to hire additional workers or reduce the size of their workforce in the coming quarter. It is the most comprehensive, forward-looking employment survey of its kind and is used as a key economic statistic by both the Bank of England and the UK government.

Jason Greaves, Operations Director at Manpower, said: "The jobs market in the East Midlands is beginning 2018 on a high, with its strongest Outlook in over a year. The region is going from strength to strength as a transport and logistics hub and this is evident in the fact that drivers have the most in-demand skillset in the region this quarter. We are actually having to look at alternative ways of attracting talent in the market as fewer people are actively seeking work, yet demand just keeps rising."

Greaves continues: "Parcel and delivery companies are exceptionally busy right now and this is set to continue into the new year with the January sales and likely spate of returns. Together with the West Midlands, which just pipped us to the top of the regional league with an Outlook of +12%, the "golden triangle" of driving and logistics in the Midlands is powering confidence in the region's jobs economy."

The Midlands engine is also fueling the national transport sector, which has seen a 10 point leap in hiring intentions, to +12%, as rising demand combines with the trend of employers "stockpiling" permanent employees to avoid the pressure of a Brexit exodus on an aging workforce.

James Hick, Managing Director for ManpowerGroup Solutions: "The Transport sector is a key outlier in the dreary national picture. With online purchases accounting for £2 in every £5 of spending over the festive period, there is an immediate pressing need for professional drivers. This quarter the driver shortage is more acute than ever, thanks to a shrinking pool of talent. Combined with the skyrocketing demand, it is driving up pay significantly – many companies are having to pay premiums of up to 20% on their standard rates for drivers. With

so many EU workers employed in driving and logistics roles, employers are already mindful of the cliff edge scenario of exiting EU workers that may accompany Brexit. We are therefore seeing companies in the transport sector “stockpiling” drivers by signing them up for permanent contracts ahead of May 2019.”

Nationally, downbeat hiring intentions in sectors such as Finance and Business Services and the Public Sector have both weighed heavily on the national picture this quarter and employers have their lowest level since 2012. Hick continues: “The national Outlook hasn’t dipped below +5% since the final quarter of 2012, yet this quarter we are seeing the worrying double whammy of a fall in confidence nationwide and flatlining hiring in London. This makes for a pretty bleak midwinter considering it comes at a time when Brexit talks are on a knife-edge. It will no doubt prompt fears that our high-flying jobs market might be cooling off.”

Elsewhere in the regions, the positivity across the Midlands radiates to Yorkshire and the Humber, which has built on a positive 2017 and is up one point to +8%. Looking further north, the North East and North West have seen contrasting fortunes this quarter. The North East is up four points to +6%, its most optimistic level since Q1, 2017. However, the North West is down to +3%, a two-point quarterly fall.

Hiring pessimism is particularly acute in London, where the Outlook has fallen three percentage points to 0%, and the wider South East, where the Outlook is just +3%. Conversely, Wales is riding high on +7%, its best start to a year since 2013 and four-point quarterly rise. Despite a one point fall from last quarter, Scotland is slightly above the national outlook on +5%. After a strong end to 2017, the outlook in Northern Ireland has fallen three points so the region will begin 2018 in line with the national average of +4%.

**NOTES TO EDITORS**

A ‘Net Employment Outlook’ is calculated by subtracting those employers who plan to reduce staffing levels from those who plan to hire staff. A positive result indicates that more employers plan to increase rather than decrease staffing levels; a negative result reflects the opposite. [% increase - % decrease]

Commentary and full details on every sector and region can be found in the survey report at [manpowergroup.co.uk/meos](http://manpowergroup.co.uk/meos), or by calling the Press Office on 0207 404 5959/ [manpower@brunswickgroup.com](mailto:manpower@brunswickgroup.com)

Commentary is based on seasonally adjusted data where available. Full survey results for each of the 42 countries and territories included in this quarter’s survey, plus regional and global comparisons, can be found in the ManpowerGroup Press Room at [www.manpowergroup.com/meos](http://www.manpowergroup.com/meos). In addition, all tables and graphs from the full report are available to be downloaded for use in publication or broadcast from the ManpowerGroup Web site at: <http://www.manpowergroup.com/press/meos.cfm>

Note that in Quarter 2 2008, the Survey adopted the TRAMO-SEATS model for seasonal adjustment of data. As a result, you may notice some seasonally adjusted data points change slightly from previous reports. This model is recommended by the Eurostat department of the European Union and the European Central Bank, and is widely used internationally.

**About the Survey**

The world leader in innovative workforce solutions, ManpowerGroup releases the Manpower Employment Outlook Survey quarterly to measure employers' intentions to increase or decrease the number of employees in their workforce during the next quarter. It is the longest running, most extensive, forward-looking employment survey in the world, polling nearly 59,000 employers in 42 countries and territories. The survey serves as a bellwether of labour market trends and activities and is regularly used to inform the Bank of England's Inflation Reports, as well as a regular data source for the European Commission, informing its EU Employment Situation and Social Outlook report the *Monthly Monitor*. ManpowerGroup's independent survey data is also sourced by financial analysts and economists around the world to help determine where labour markets are headed.

**About ManpowerGroup**
