

## **SOUTH WEST HIRING SENTIMENT SLIDES BUT WORKERS REMAIN IN DEMAND**

### **MANPOWERGROUP EMPLOYMENT OUTLOOK SURVEY REVEALS FALL IN HIRING OPTIMISM IN THE SOUTH WEST**

- **Outlook of +5% for the region, down three points on last quarter**
- **Hiring optimism in line with national average**
- **High demand for permanent and manufacturing roles**

**14 MARCH 2017:** Employers in the South West are becoming more cautious about hiring as we move deeper into 2017 according to ManpowerGroup, the world's workforce experts. Although employment optimism in the region is in line with the national average at +5%, the South West is one of seven regions facing a falling outlook.

The ManpowerGroup Employment Outlook Survey is based on responses from 2,119 UK employers. It asks whether employers intend to hire additional workers or reduce the size of their workforce in the coming quarter. It is the most comprehensive, forward-looking employment survey of its kind and is used as a key economic statistic by both the Bank of England and the UK government.

Simon Edwards, Operations Director at ManpowerGroup, said: "South West employers are clearly a little apprehensive about the future, but we're seeing enough life in the hiring market to suggest jobseekers can be cautiously optimistic. There remain plenty of opportunities across sectors, despite the slowdown in overall sentiment. In fact, permanent roles are increasingly available, with operations supervisors, quality engineers and support specialists in particularly high demand. We are also seeing an increase in demand for manufacturing roles, particularly for those with specialised skills. Such roles are difficult to fill, so employers are keen to secure quality candidates. Metal fabricators, for example, are in luck.

"In Plymouth, the expansion of call centres for Sitel, Marks & Spencer and John Lewis are helping to drive jobs positivity. We are also seeing strong demand for assembly line, production officers, and temporary end-of-production roles in the city. The South West may have lowered hiring expectations generally, but there are still good opportunities out there for employers and candidates."

Nationally, private sector hiring has dropped to its weakest level since Q1 2014. Employers in six of the nine sectors surveyed reported a falling Outlook. The overall Net Employment Outlook, which includes both public and private sector employers, has dropped two points to +5%.

Mark Cahill, ManpowerGroup UK Managing Director: "The impending trigger of Article 50 is clearly affecting confidence in the jobs market. The private sector plans to hire at its slowest rate since 2014 (+4%), with only construction, manufacturing and transport and communications planning to hire at previous levels. The employment rate is at its highest level

since records began in 1971, but if you lift the bonnet to look at the engine of the economy, job creation has slowed and employers are becoming more cautious. The companies which have powered Britain's economy through the immediate post-referendum period are easing off the gas.”

All but five regions report falling Outlooks for the coming three months compared to the previous quarter. The biggest fallers are the two strongest Remain-supporting areas of the UK: Scotland, down 11 points to -3% and London, down five points to +3%. The West Midlands and Yorkshire & the Humber both fell three points to +5%. The North East and South East are both down one point to +5% and +4% respectively. Northern Ireland and the North West are the only risers, both up three points to +7% and +6% respectively. Three regions report unchanged Outlooks: the East (+9%) is still the most optimistic region ahead of the East Midlands (+8%), while Wales (+2%) reports the second weakest Outlook in the UK.

**NOTES TO EDITORS**

**NOTES TO EDITORS**

A 'Net Employment Outlook' is calculated by subtracting those employers who plan to reduce staffing levels from those who plan to hire staff. A positive result indicates that more employers plan to increase rather than decrease staffing levels; a negative result reflects the opposite. [% increase - % decrease]

Commentary and full details on every sector and region can be found in the survey report at [manpowergroup.co.uk/meos](http://manpowergroup.co.uk/meos), or by calling the Press Office on 0207 404 5959/ [manpower@brunswickgroup.com](mailto:manpower@brunswickgroup.com)

Commentary is based on seasonally adjusted data where available. Full survey results for each of the 43 countries and territories included in this quarter's survey, plus regional and global comparisons, can be found in the ManpowerGroup Press Room at [www.manpowergroup.com/meos](http://www.manpowergroup.com/meos). In addition, all tables and graphs from the full report are available to be downloaded for use in publication or broadcast from the ManpowerGroup Web site at: <http://www.manpowergroup.com/press/meos.cfm>

Note that in Quarter 2 2008, the Survey adopted the TRAMO-SEATS model for seasonal adjustment of data. As a result, you may notice some seasonally adjusted data points change slightly from previous reports. This model is recommended by the Eurostat department of the European Union and the European Central Bank, and is widely used internationally.

**About the Survey**

The world leader in innovative workforce solutions, ManpowerGroup releases the ManpowerGroup Employment Outlook Survey quarterly to measure employers' intentions to increase or decrease the number of employees in their workforce during the next quarter. It is the longest running, most extensive, forward-looking employment survey in the world, polling over 58,000 employers in 43 countries and territories. The survey serves as a bellwether of labour market trends and activities and is regularly used to inform the Bank of England's Inflation Reports, as well as a regular data source for the European Commission, informing its EU Employment Situation and Social Outlook report the *Monthly Monitor*. ManpowerGroup's independent survey data is also sourced by financial analysts and economists around the world to help determine where labour markets are headed.
