Wales' Hiring Outlook Remains Strong Despite Small Decline

MARKET OVERVIEW

Employers in Wales anticipate a strong labour market in the July – September period, reporting a Net Employment Outlook of +27%.

Employers in Wales report that hiring Outlook has cooled slightly since last quarter but has continued to hold steady. As has been the case across the UK, there is high demand for both temporary and permanent workers, which supply is unable to meet. This is especially true of the driving and primary production sectors. This compounds issues with low pay and inadequate benefits meaning skilled candidates are choosing to take their talents elsewhere.
